Screw adjustable by the user	<ul style="list-style-type: none"> - Instruction manual - More than 360° - User 	OSM/LUM-ETF5	2019 ETICS Plenary Meeting
Question			
<p>Can a simple screw, adjustable by the user, be considered effective as a protection against twisting of the cord?</p>			
Decision			
<p>According to the standard, it is acceptable for a screw to be used to prevent the wiring twisting more than 360°. In case the user has to assemble the luminaire, the construction must be clearly indicated in the instruction manual.</p>			
Explanatory notes
