

COLLECTION OF CIG-OSM/IN DECISIONS

Standard: General	Sub clause: -	Sheet no. OSM/IN 001 Page 1(1)
Subject: Locking device for rivets serving as electrical as well as mechanical connections	Key words: Locking device	Meeting no. 1 2 Item 3.13.1 3
<p>Question: Is locking also necessary if those connections in normal use are not subjected to torsion or if torsion is not possible, i.e. the connection is in a cavity?</p> <p>Decision: Only rivets subject to torsion need to be provided with a locking device.</p> <p>Explanatory notes: 1) No reference to document. See 191 OSM/IN Milan Meeting Minutes (ÖVE item) 2) See OSM/IN (Norway) July 4, 1992</p>
