

CIG-OSM/IN DECISION

Standard: EN 60799:1998	Sub clause: General	Sheet N°: OSM/IN 203 Page: 1(1)
Subject: CCA-NTRs for cord sets	Key words: - Cord set, - Plug, - Cord, - Coupler	Meeting N°: 14 - 17 Item: 8.1 - 4.1.1
Question:	EN 60799 contains no test procedures itself but refers to the requirements of the standards for the single components plug, cord and coupler (if any). Is a CCA-NTR for a cord set just as acceptable as separate CCA-NTR/ CB Test Certificates for the plug, the cord and the coupler?	
Decision:	A cord set can either be covered by one CCA-NTR according to EN 60799 or separate CCA-NTR/CB Test Certificates for the plug, the cord and the coupler (if any). In each case the CCA-NTR is based upon the CCA/CB Test Reports of the single components and the formal requirements of EN 60799 (max. length, allowed combinations) shall be fulfilled.	
Explanatory notes:	OSM/IN Decision based on CTL Decision No DSH 444 taken at the 40th CTL meeting (2003).
